

Special Issue: EuroComb '03 – Graphs and Algorithms

Guest Editors: J. Nešetřil and M. Bálek

Contents

Contributions

Guest Editors	1972
<i>A. Tiskin</i>	
Packing tripods: Narrowing the density gap	1973
<i>T. Dvořák and P. Gregor</i>	
Hamiltonian paths with prescribed edges in hypercubes	1982
<i>S.-y. Choi and P. Guan</i>	
Construction of a family of graphs with a small induced proper subgraph with minimum degree 3	1999
<i>M. Janata</i>	
About a new class of matroid-inducing packing families	2002
<i>Y. Dourisboure and C. Gavoille</i>	
Tree-decompositions with bags of small diameter	2008
<i>M. Habib, D. Kelly, E. Lebhar and C. Paul</i>	
Can transitive orientation make sandwich problems easier?	2030
<i>J. Chlebíková and K. Jansen</i>	
The d -precoloring problem for k -degenerate graphs	2042
<i>R. Caha and V. Koubek</i>	
Spanning multi-paths in hypercubes	2053
<i>L. Nebeský</i>	
The interval function of a connected graph and road systems	2067
<i>E. Beigman</i>	
Extension of Arrow's theorem to symmetric sets of tournaments	2074
<i>J. Díaz, M. Serna and D.M. Thilikos</i>	
Complexity issues on bounded restrictive H -coloring	2082
<i>S. Finbow, A. King, G. MacGillivray and R. Rizzi</i>	
The firefighter problem for graphs of maximum degree three	2094

<i>Y. Nigussie</i>	
Algorithm for finding structures and obstructions of tree ideals	2106
<i>D. Gonçalves</i>	
Caterpillar arboricity of planar graphs	2112
<i>S. Suzuki and T. Ibaraki</i>	
The complexity of assigning genotypes to people in a pedigree consistently	2122
<i>G. Fertin and A. Raspaud</i>	
$L(p, q)$ labeling of d-dimensional grids	2132
<i>F. Bazzaro, M. Montassier and A. Raspaud</i>	
$(d, 1)$ -total labelling of planar graphs with large girth and high maximum degree	2141
